- 99% compatibility with all browsers
- Site Seals identify your site as authentic and validated by a trusted 3rd party:
 - Quick SSL Premium provides a dynamically-generated site seal with a time/date stamp
 - Quick SSL provides a static or animated site seal

SECURE ONLINE TRANSACTIONS AND APPLICATIONS WITH CONFIDENCE

With GeoTrust QuickSSL and QuickSSL Premium web server certificates, you can start conducting secure online transactions with confidence, quickly and cost-effectively. By activating the browser's "LOCK" icon, QuickSSL and QuickSSL Premium assure online visitors that confidential information and transactions cannot be viewed, intercepted or altered. And because our authentication system is the most advanced in the industry, your customers and trading partners can be sure that GeoTrust certificates are only issued to fully authorized recipients.

SSL Certificates Delivered Fast and Cost-Effectively

Unlike other SSL products, you don't have to wait days to get your certificates — GeoTrust will issue your QuickSSL certificate in about 10 minutes with GeoTrust's fully automated authentication and issuance process. This process verifies that a certificate purchaser has appropriate administrative rights to a web server's domain. This greatly lowers our costs for issuing QuickSSL certificates, and we pass those savings on to you.

There is a lot of misinformation regarding the cost behind producing and delivering certificates which other vendors use to justify their "premium" pricing approach. QuickSSL and QuickSSL Premium's automated certificate issuance process, allows us to price certificates in a fair and realistic manner. Now you can assure your customers that their online transactions and information are secure without having to pay an unreasonable price. Plus, for organizations that require five or more certificates, bulk purchase discounts are also available.

QuickSSL and QuickSSL Premium Certificate Features and Benefits Include:

Fully owned roots. GeoTrust owns all of its roots, and as a result, all of our certificates offer the highest level of stability. Unlike other companies which issue certificates off chained roots or license roots from third parties, GeoTrust is able to offer customers an assurance of root stability throughout the lifetime of every certificate.

99% browser ubiquity. QuickSSL and QuickSSL Premium certificates are issued off of one of the world's most trusted roots. They deliver ubiquitous recognition with leading servers and 99% web browser recognition.

Unlimited, free self-service reissues. GeoTrust provides a quick and easy way to reissue any lost certificate at no charge. Certificates may need to be reissued when upgrading or changing server software or operating platform; if migrating your site from one server to another, or if an existing private key has been lost, destroyed or otherwise inadvertently overwritten.

After re-validating certificate information online, the new certificate is issued immediately and is valid from the date of reissue until the original expiration date.

Site seals. GeoTrust site seals allow your customers to identify and confirm that your web site is using a leading SSL certificate. The seal resides on your web pages, identifying your site as genuine, authentic and validated by an independent third party.

QuickSSL Premium includes a dynamically generated site seal. When a customer clicks on the seal, the server automatically performs a domain look-up to verify they're visiting a legitimate site. It also provides a time/date stamp to ensure authenticity.

QuickSSL comes with an optional static or animated seal that features the GeoTrust logo.

Competitive trade-in program. GeoTrust provides a simple way to upgrade from another vendor's certificates or transition multiple certificates from disparate certificate vendors. The competitive trade-in program allows you to retain the full value of existing certificate investments, by adding the remaining validity period of any active vendor certificates to your new GeoTrust certificates — up to 12 additional free months depending on when your current certificate expires.

Online Access to Your Business Profile

As part of the provisioning process with QuickSSL and QuickSSL Premium, your business will be registered with ChoicePoint, the nation's leading provider of identification and credential verification services. With access to the corporate profile, customers can be confident conducting business online.

Multi-year certificates. QuickSSL and QuickSSL Premium are available in multi-year validity periods at significant cost savings. Plus, you avoid the process of renewing certificates every year.

Automatic renewal reminders and early renewal options. With QuickSSL and QuickSSL Premium, administrators are automatically notified when their certificates are close to expiration, so certificates are always valid. GeoTrust also allows administrators to renew certificates up to 90 days early and receive up to three months credit on new certificates.

Customer support options. QuickSSL and QuickSSL Premium offer optional customer support services for those customers that need assistance installing and maintaining their certificates.

HIGHEST STANDARDS FOR CERTIFICATE PRACTICES AND PHYSICAL SECURITY

As the world's second largest Certificate Authority, GeoTrust provides the highest assurance of trust to all its customers. GeoTrust maintains compliance with WebTrust, a comprehensive third-party auditing process which signifies that GeoTrust meets the highest standards for issuing and managing digital certificates.

GeoTrust also leverages the best possible physical infrastructure and network security to maintain customer accounts and certificate data. Our state of the art hosting facilities are fully redundant and hardened data and network operations centers that meet stringent WebTrust standards for physical and network access control. Independent security auditors also carefully scrutinize the physical systems, the software configurations and the processes and procedures used by all GeoTrust personnel.

About GeoTrust, Inc.

GeoTrust is a leader in identity verification and trust services for e-business. Its products include web security services for secure e-commerce transactions, identity verification, managed security services and TrustWatch (www.trustwatch.com), a free toolbar and search site that helps consumers recognize whether a site has been verified and is safe for the exchange of confidential information. With more than 70,000 companies in over 140 countries using its technology for online security, GeoTrust has rapidly become the second largest digital certificate provider in the world.
